MUSIC COMPOSITION AND PRODUCTION

## ABOUT CREARTISTIC

creartistic provides high-quality compositions and music productions for films, computer games, audio books, presentations and websites - on time and even on tight budgets.

As a multimedia venture, creartistic also takes on international commissions. High-speed internet connection facilitates fast transfer of film and music material and immediate reaction to any changes in production or preference.

The man behind creartistic is Austrian composer **Alexander Schiebel** who has specialized in composing and emulating symphonic program music. His works build bridges between classical and modern styles, between media and art, between functionality and originality.

## ART AND TECHNIQUE

creartistic uses sophisticated hard- and software synthesizers to meet the standard that the media deserves, particularly the famous *Vienna Symphonic Library* instrument samples. Furthermore creartistic is in constant collaboration with skilled musicians and vocalists.

It is the combination of technical know-how and artistic experience that makes creartistic a reliable and competent partner in the creative process.

## WORK HISTORY

The award-winning music of creartistic composer Alexander Schiebel covers several hundreds of minutes of meticulously orchestrated music in a wide range of styles, from symphonic, romantic to ethno and techno.

Samples of his work can be downloaded from the website [www.creartistic.com](http://www.creartistic.com) or listened to from the creartistic **demo-cd**.

## STANDARD FEE

creartistic does not compose music for free, but occasionally works with students and independent filmmakers on a profit-sharing basis. Otherwise standard creative fees amount appr. \$200,- per minute music (covering composition *and* production in the creartistic studio).
